

Andre Emanuel Moro Puma

Arequipa, Peru | pe.linkedin.com/in/a-moro | Spanish native | English C1 | Open to remote

Summary

Psychology graduate using behavioral insight to understand people and design better products. Experience across clinical, educational, organizational, and community settings, with product-building practice in UX research, Figma, Supabase, and AI-assisted development.

Experience

English Teacher, El Cultural Feb 2026 - May 2026

- Adapted lessons to different levels, assessed progress, and translated complex ideas into clear explanations.

Clinical Psychology Support, EsSalud - Arequipa Aug 2024 - Dec 2024

- Applied and registered psychometric tools including MMPI-2, 16PF, BDI-II, and Luscher under supervision.
- Supported neuropsychological and cognitive aptitude evaluation with Stroop, Rey Complex Figure, Raven, Terman-Merrill, and Progressive Matrices.
- Prepared structured notes and inputs for clinical reports while handling sensitive information carefully.

Educational Psychology Assistant, Colegio Mendel - Arequipa Mar 2024 - Jul 2024

- Prepared technical and psychoeducational reports and supported prevention, guidance, and institutional workshops.
- Delivered weekly talks for students and parents and designed posters, presentations, and videos for different audiences.

Human Talent Intern, Revo Fitness / Revo Sport - Arequipa Mar 2024 - Jul 2024

- Supported staff coordination, employee support, administrative processes, and cross-team service operations.

Community Psychology Support, CODISEC Cerro Colorado - Arequipa Mar 2023 - Jul 2023

- Provided guidance through active listening and contributed to outreach, prevention, and public wellbeing initiatives.

Organizational Psychology Intern, FH Ingenieros Contratistas - Arequipa Aug 2022 - Dec 2022

- Supported recruitment, candidate screening, onboarding, employee transition, and personnel communication.
- Applied psychometric and psychosocial tools to support performance and workforce adaptation decisions.

Projects

Fuel

UX/Product case study for a mobile app that helps drivers make clearer, more confident refueling decisions.

- Defined the core user problem around decision friction, trust, comparison, planning, and rewards to prioritize the product scope.
- Designed the app structure and user flows to clarify choices and speed decision-making, translating priorities into interface hierarchy and prototype direction.

Weights

Local-first, offline-ready mobile product for lifters to track personal records without accounts, ads, social features, or workout-log bloat.

- Designed a track-based system where each lift's Update action replaces the current best or latest value while preserving history for simple progress graphs.
- Simplified fast gym use around adding lifts, switching kg/lb, updating PRs, and viewing progress; scoped plate/stack support, realistic inputs, and delta tags.

Deskapp

Mobile-to-desktop utility concept for simple device connection and everyday desktop actions.

- Mapped the connection journey around intuitive pairing, clear system status, and quick actions to reduce setup friction and confusion.
- Defined a focused interaction hierarchy for a seamless daily-use utility, prioritizing clarity over feature-heavy complexity.

Education and Certifications

Universidad Catolica de Santa Maria, Bachelor in Psychology - Arequipa 2020 - 2024

Microsoft Office Specialist Associate: Excel 2019, Word 2019, PowerPoint 2019.

Skills

Research and Psychology: User interviews, observation, active listening, psychometrics, psychosocial diagnosis, technical reporting

Product and Technical Fluency: Figma, Supabase, AI-assisted product prototyping, agentic coding workflows, rapid MVP development

Languages: Spanish native, English C1
